

## **Maggie Bota-White Air Canada at World Travel Market London [youaretube.com]**

Travel Radio Australia radio and television and we're here in London at the World Travel Market and I have Maggie Bota White from Air Canada and welcome Maggie to the program. Well thank you very much Jeff it's nice to be here again. World Travel Market obviously is a big part of our business here we get to see a lot of people and we've got such a great lot of information and new things happening at Air Canada as well which is very exciting.

Now I believe there's some services coming out of Australia which is very exciting new ones yes. We're really lucky yes we've got some the brand new Dreamliner aircraft and we're coming flying out of Sydney Melbourne and Brisbane into Vancouver and then obviously we have daily services from Vancouver to London so it's seamless travel. Now Air Canada is such a great you know hub sort of airline where you can base yourself and you go all over the world basically.

Well we do we are a global airline and people think because of the name Air Canada we just fly to Canada but obviously we don't. Toronto is our main hub I would say from the UK into Canada and from there Toronto we have great connections down to the USA also down to South America and Caribbean. But the new Dreamliner is just fantastic isn't it for someone who hasn't experienced it tell us a bit about it.

Well I'm very lucky to have actually been on the Dreamliner a couple of times with Air Canada and the new technology is absolutely fantastic. You come off and you feel quite refreshed because the quality of the air is excellent. The windows are bigger higher ceiling so you get a lot more light coming into the cabins and there's a little bit more room for putting your suitcases up on the cabins as well above.

And I believe the even the economy experience is fantastic. Yeah economy never forget economy of course and we do have now three different cabins we have economy premium economy and business class. And I suppose the business class has the lovely that's lie down seats and you get your own little space that must be terrific as well.

We certainly do yes we have the life lap beds plenty of space to put all your glasses, a cup of tea, drinks, notebook. It's fantastic in fact we are really lucky to have won an award for from Skytrax as best airline in North America so we're really proud of that. Now I do believe that once you get into Canada Air Canada takes all your domestic travel and makes it super easy.

Well yes we like to make things nice and easy for the customer so it's seamless travel there's really good connections and obviously it's important nowadays sometimes travel can be rather stressful so some of the processes that we have now make that a bit easier for the customer. And Maggie how can people find out more online? Well we do have our own website at [canadap.com](http://canadap.com) or obviously people go through the travel agents. Thank you very much Maggie for being on the

program.

Thank you very much Jeff, it's been a pleasure.
